

Year 2 Theme projects to do overtime

History Research project: To create a scrap book or fact file answering the question: Where does my food come from?

We have been learning about dairy farms and how they contribute to our food supplies.

Here are some questions you might want to research, with an adult, and answer in your scrap book/fact file.

- What are the top ten most popular fruits
- Where do the fruits grow?
- How is food transported from where it is grown to the supermarket?
- How can we help the environment with our food choices?
- What makes a healthy balanced meal and diet?

Science Research project: Animals including humans

Investigation: Do older people have bigger heads?

Create a table

Person	Head measurement

What does your data show you?

Who had the biggest?

Who had the smallest?

Why do you think this might have been?

Can you create a bar chart to present your evidence!

Investigation: Do younger people have smaller feet?

Create a table

Person	Foot measurement

What does your data show you?

Who had the biggest?

Who had the smallest?

Why do you think this might have been?

Can you create a bar chart to present your evidence!

Investigation: What makes a healthy lunch?

Design and draw a healthy lunch and an unhealthy lunch. Label the food and liquid. Explain why you have chosen the food you have.

What do you know about the different foods? For example, I know that sugar gives you a quick release of energy.
