

Mrs Murphy's Very Hungry Caterpillars Page 2

Day 10

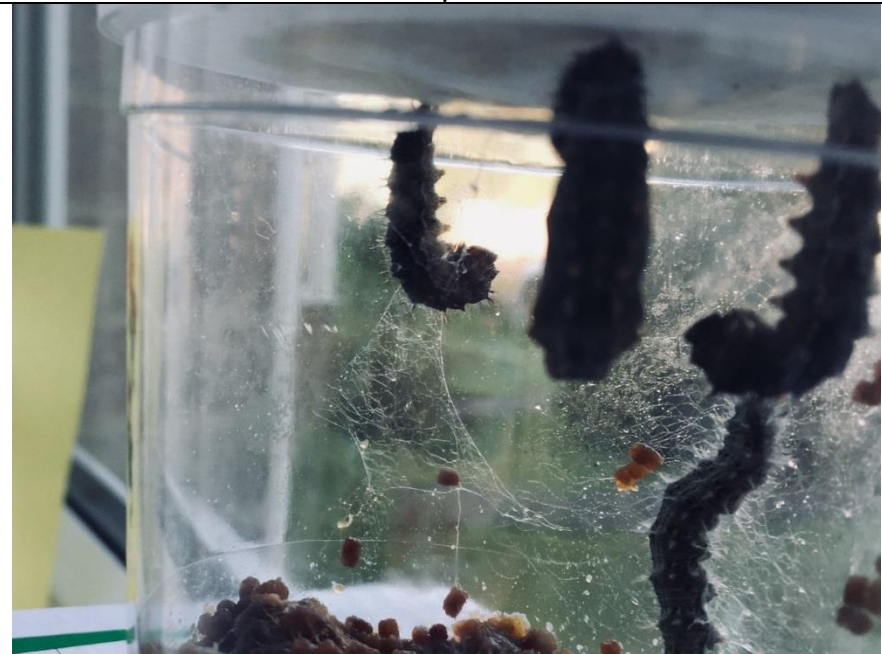

Here you can see one of the caterpillars in a j shape. This one is getting ready to form its chrysalis.

Two more have climbed to the top, one is on its way and the other one is still in the bottom of the cup.

Can you see the details close up? You could observe this very closely and draw them just like scientist and wildlife experts do.

Day 11

Here we have three caterpillars in the j shape. I will need to keep the cup very still now. This is an important time in 2 or 3 days the chrysalides will harden. I will send a photo when all of them are at this stage. Then we need to be patient.
