

Day 2- Applying the column strategy

Show your working out using the column method. Don't forget you can use the tens and ones chart to help you, from yesterday!

1. Tom has 13 pencils. He finds 5 more in the playground. How many does he have in total?
2. Betty picks 23 daisies from her garden and 12 from the park. How many daisies does she have altogether?
3. Tracey buys 12 stickers on Monday and 16 stickers on Tuesday. How many stickers does she have now?
4. Steve scored 27 goals last season and 22 goals this season. How many goals did he score in total?
5. Rosie has 31 rubbers and finds 15 more. How many rubbers does she have in total?

Pick one of the questions you answered and explain your method (verbally or in writing):

SUPER CHALLENGE: Write your own addition word problems for a sibling or parent to solve.

Answers

1. 18

2. 35

3. 28

4. 49

5. 46
