## Our Solar System

### Marvelous Mayans

We concluded our studies of the ancient Maya by making masks and sculptures inspired by the archeology and artefacts we had seen.

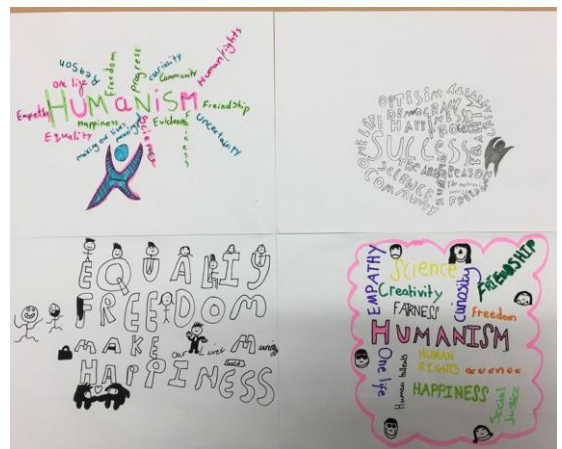

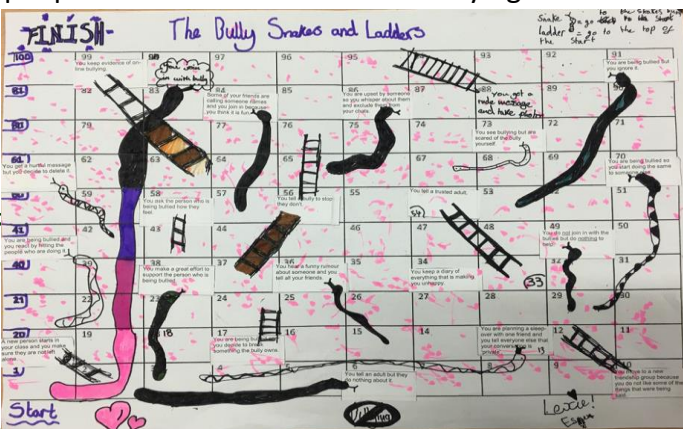

We have been learning about 'Our Solar System'. We learned about the movement of the Earth, and other planets, relative to the Sun. We also described the movement of the Moon relative to the Earth. We used models to help us to understand why the Moon does not always look the same and described how a shadow on the Earth from the Sun changes over the course of a day.

### PHSE

Our topic has been 'celebrating difference'. We understand that not respecting the ways in which people are different can lead to bullying.

### RE

In RE, our topics have been Christianity, Judaism and Humanism.

We have been learning about the different beliefs, practices, symbols and actions that are associated with these groups and thought about how they relate to our own lives.

**Merry Christmas and a happy new year to you all!**
