

MAPLE NEWS!

Autumn 2020

All around the World

Everyone thoroughly enjoyed learning about mountains around the world in our geography unit. In History, we looked at the Shang Dynasty and compared this to other empires they have learned about. Next, we looked at the Silk Road and how important it was for trading goods. As this route crossed many countries, we made comparisons about trade nowadays and even managed to link it to Christmas in this last week.

Have a look on Google Classrooms to see the presentation your child has made about Christmas in another country!

One of the most enjoyable units in English this term was the non-fiction text about the Universe.

The children used it as inspiration for writing their own non-chronological reports about Pandora and had the opportunity to incorporate pictures to their preferred layout.

Bodies – Heart and Health

During this term, we have looked at the circulatory system in science and its importance to the functioning of our bodies. The class were both repulsed and overjoyed when they got to make their own blood bags!

For the latter part of the term, we have looked at how to keep our bodies healthy and why it's important to do so.

It's beginning to look a lot like Christmas...

Maple class had so much fun creating paper chains on Christmas Decs Day! The children also made Christmas cards which they are really excited about bringing home to show you.
