Dear Parents/Carers

Severe food allergies in Year 1

Many of you are aware that we have children who attend Greenway who are have epipens because they can have severe reactions to a trigger, such as an allergy.

In your child's class we have a child who is so sensitive to certain triggers that if they come into contact with or ingest this frequently leads to hospitalisation. To ensure their safety and well-being we are reminding you to:

Not send in anything containing nuts, sesame, and egg.

Do not send your child into school with hummus or avocado for snack or lunch.

Thank you for your cooperation in this matter.

Regards

Mrs Ellwood
Headteacher
